By Nick Davis A MP3 file is a compressed digital music file. MP3 files generally are available on the Internet for downloading to your computer or transferring to a audio player like an iPod or other music device. Downloading and saving an MP3 file to your computer takes just a few steps. Visit one of many websites that sell MP3 files--Amazon.com, Walmart.com, iTunes.com, Napster.com and MP3Download.net are a few big ones. Most of them require you to register a user account. Most sites charge a fee for downloading MP3 files. Typically, a membership allows you to download a certain number of MP3 files each month. Files can be purchased with a credit card or gift card. MP3 files generally are intended for personal, non-commercial use. You are allowed to burn the files to a compact disc, play them on your computer or transfer them to your MP3 player. But you are not allowed to copy them for friends or use them for a commercial purpose. To download an MP3 file to your PC, right-click on the Download option of the MP3 file and select "Save Target As" if you are using Internet Explorer or "Save Link As" if you are using Firefox. Next, navigate to the directory where you want the file to be saved. Once the download is complete, you can open the file to play it or transfer it to your MP3 player. To play your downloaded MP3 file, open it in Windows Media Player, Real Player or any other music player. To download an MP3 file to your Macintosh computer, control-click on the "Download" option of the MP3 file and select "Save this link as." Select the directory where you want the file to be saved. Once the file is downloaded, open the MP3 file in your favorite music player or transfer it to your iPod or other MP3 player. By Christina Shaffer i image courtesy of Microsoft. The Philips GoGear MP3 allows you to sync hundreds of your favorite songs from your PC and listen to them on-the-go. Many GoGear models are bundled with the Philips Songbird software for transferring music and videos to the device. After you import your music or rip an album to your Songbird music library, you can sync them directly to the GoGear by using the drag-and-drop method. Prior to syncing the files, however, make sure they are in a format that is supported by your player’s model, such as MP3 or WAV. Connect the Philips GoGear to the computer by using the device’s USB cable. Add music to your Songbird music library by clicking the “File” tab and selecting the “Import Media” option. Select the folder that contains the songs you want to sync to the device, such as My Music, and click “OK.” Click “Music” in the Library pane to view all of the songs you imported. Select the songs you want to sync to the device. To select multiple tracks, hold the “Ctrl” button on the keyboard and click each song with the mouse. Click and drag the highlighted songs to the Philips GoGear icon in the Library pane to automatically sync the files to the device. monticello/Shutterstock.com Do you want to download a song from SoundCloud to your device for offline listening? If so, there’s an official way to save music tracks from this site, and we’ll show you how to use it. Limitations of Downloading Songs on SoundCloud Not every song on SoundCloud is downloadable. You can only download the songs whose creators have made those songs downloadable. Also, you can’t perform this download process on a mobile device. You must use a Windows, Mac, Linux, or Chromebook computer to save songs from SoundCloud. Additionally, downloading songs requires you to sign in to your SoundCloud account. Download Songs From SoundCloud to Your Computer To start the download process, first, open a web browser on your Windows, Mac, Linux, or Chromebook computer and launch the SoundCloud site. Then log in to your SoundCloud account. When you are logged in, at the top of the SoundCloud site, click the “Search” field. In the “Search” field, type the name of the song you want to download and press Enter. From the search results that appear, find the song to download. Then, beneath the song, click the More > Download File option. Note: If you don’t see the “Download File” option, you can’t download that specific song. This is because the creator doesn’t allow that song to be downloaded. Your computer’s standard save window will open. In our example images, we’re using Mac. Here, click the “Save As” box and type a name for your song. Choose a folder to save your song in. Then, at the bottom of the window, click “Save.” And your chosen SoundCloud song is saved to your computer. You can now convert this downloaded song to another format, transfer it to your Android phone, or add it to Apple Music for on-the-go listening. Besides SoundCloud, there are several other sites where you can legally download music for free. Check them out if you’re interested. RELATED: 7 Best Places to Download Free Music (Legally) By Laila Alvarez i Sean Gallup/Getty Images News/Getty Images Sharing music you've written or podcasts you've recorded with millions of people all over the world is simply a matter of a few clicks of your computer mouse. There are so many free websites offering to host your images, videos and, of course, music that sharing content has never been easier. Simply by finding the hosting site that works best for you and uploading your MP3, your file will be a link on the Web in no time. Locate the MP3 song file on your computer. You may have a folder titled "My Music" in your "My Documents" folder, for example, that contains your MP3s. Find the MP3 file and remember the name of that file for easy uploading later on. Visit one of the many MP3 hosting sites. Check www.audiohostings.com for a list of different mp3 hosting sites. Some, such Kiwi6, host only mp3s. Others, though, can host MP4s, WAV or other types of music files. Look through the sites to find the one that you trust the most. Kiwi6 and Filexoom are easy to understand and work well. Once you've found the MP3 hosting site you'd like to use, locate the "Upload Now" or "Browse" button on the website. Find the MP3 file on your computer to upload to the MP3 hosting website. Click "Upload" and wait for the file to upload onto the computer. You should see a progress bar to watch the upload in progress on most hosting sites. Get the link provided by the hosting site that will go directly to the song download page or a link that will automatically download the song. This link should be provided immediately upon upload completion on the hosting site. You are now free to post that link in message boards or on a personal website to share with others. Remember to follow any copyright guidelines the song may have attached to it.
